VERVLOET

1905

Vervloet is a Belgian family business that specialises in handcrafted decorative hardware and its accessories since 1905.

Today more than 80% of its sales are generated on foreign markets, which make Vervloet a leader in this field.

Vervloet's strength? The flexibility of its structure and the exclusiveness of its production, taken from Vervloet's collection that counts more than 45,000 different references.

The variety of styles is infinite: Gothic, Renaissance, L.XIV, L.XV, L.LXVI, English, Empire, Art Nouveau, Art Déco, Arabian, Modern and Contemporary.

Each piece of work can be adapted to answer the client's wishes as best as possible.

Moreover, the range of products is very complete, ranging from door handles and doorknockers to cremone bolts as well as espagnolette bolts, locks, doorstops and other handles.

This enables Vervloet to create a harmonious cohesion of decorative elements of client's houses.

Finally, and most importantly, all pieces are handcrafted; each item is the result of the care of Vervloet's goldsmiths.

The pieces are melted and shaped in the traditional way of sand casting, and can be in brass, bronze and white bronze. They are available in almost 20 different finishes: polished, gilded (24 carats), satin, polished nickel or chrome,...
