E. R. BUTLER & CO.

Enoch Robinson & Co. Hinge Finials

E. R. BUTLER & CO. offers an extensive range of decorative brass hinge finials, including these 19th century designs originally manufactured by Enoch Robinson & Co. of Boston, Massachusetts. Our manufacture currently includes over forty finial designs fully compatible with our mortise template, standard and wide-throw butt, paumelle and interlock hinges, in designs which complement both modern as well as traditional architectural styles. All finial designs are available in five standard diameters for compatibility with a full range of hinge dimensions. To carry

doors of all weights and sizes, our hinges are manufactured from heavy duty solid extruded brass and utilize stainless steel pins. Our hinges feature precision machined anti-friction bearing assemblies to increase load bearing capacity. Hinge dimensions vary according to door thickness and weight. Standard hinges are available for $\frac{3}{4}$, 1, $1\frac{1}{4}$, $1\frac{3}{8}$, $1\frac{3}{4}$, 2, $2\frac{1}{4}$, $2\frac{1}{2}$, $2\frac{3}{4}$ and 3 inch thick doors. Additional sizes may be special ordered. E. R. Butler & Co.'s hinges and finials are available in all standard, custom plated and patinated finishes.
