Colonial Architecture

"There is a peculiar charm that attracts us to the grand old homes of the noble New England and other colonial generations of fifty, seventy-five or a hundred years ago. Even old, deserted homes of that class seem to demand our thoughts and attention. The pillared front portico or porch, with its artistically latticed windows at top and sides, the heavy front doors, the scrupulously bright door knocker of polished brass, the bull's eye window glass, all attract and please us, and the crystal glass door knobs, smooth cut, polished and in various styles, reflecting their brilliancy in the sunlight, and repeated all through the mansion, without doubt is the leading attraction of the place. Their mute dignity appeals to our finer senses, unconsciously drawing to our memories pictures and stories of the wide, old fireplace at Thanksgiving and Christmas, surrounded by the usually large families of the grand and great-grandparents. The next time you enter one of these old homes, just look about and make observation of this one point—glass door knobs. The broad, smooth, lustrous surfaces are suggestive at once of cleanliness, purity, refinement and good taste."

NO. 4. OCTAGON PRESSED KNOBS.

Above illustration is one set of No. 4 Glass Door Knobs showing our adjustable swivel spindle, style trimming, rose, etc.

It is necessary in ordering all knobs to send thickness of doors, as the above adjustment is for three-sixteenths of an inch.

Knobs may be ordered in half sets, with spindle drilled with three holes for side screw knob (see page 3, cut G) or in half sets with closet washers. Also as drawer, shutter or latch knobs.
