Floor Lamp 12001-7

The Black-Gold Family

This elegant floor lamp is a perfect extension to our Black-Gold family. Over the length of the lamp the black and gold elements can bring their full splendour to bear.

The basic parts of the lamp such as the pole and the arms are made of brass with a dark finish which is then lacquered black. In the typical fashion of this style numerous ornaments from skilfully refined castings are applied. So for example the tassels for the candles are of perfect make. These elements are gilded in the most exquisite king's gold finish.

Design: Historical, circa 1900; Empire
