Pendant Lamp 3032-5

The Wood Family

An uncommonly small fixture this pendant lamp from wood is a very precious little piece. The artfully cut body from wood is leaf gilded and partly polished for additional highlights. Even though this design works completely without crystal the extra polishing creates an air of brilliance on this modest item.

Such small fixtures are best used in ante chambers of rural mansions or hallways. It can be mounted close to the ceiling in low rooms or suspended using a silk rope in a matching colour.
