## Lantern 4013-4

The Brass Family

For the Catholic Church in Freyung we designed this simple lantern. It combines the typical shapes of the gothic period with a taken back construction. The surface is polished without gilding to give it a plain expression.

Through the geometric composure it not only matches other Neo-Gothic designs but can also serve as a counterpoint to contemporary ambient.

Design: Zahn, circa 1980; Neo-Gothic

Material: Brass; Finish: Polished

Special requests: Other finishes, additional floodlight spots

Dia.: 35 cm, H.: 60 cm; Weight: 8 kg

Lights: 4 candles; Max. Wattage: 240 W
