## Chandelier 40570-6+3 "Mecca"

The Arabic Family

This is one of the smaller versions we did for the Al Haram Mosque of Mecca. This design marks the first appearance of traditional Islamic designs in modern day lighting. It also started a very fruitful era in our history as this approach won us several follow up contracts.

The chandelier features the typical satellite design with the lighting on outside compartments on the main rim. These are decorated with satinated glass shades bearing traditional Islamic enamel ornaments.

Design: Lobmeyr, 1975; Arabian
