Lantern 4200-3

The Historism Family

Theophil Hansen, one of the most prominent architects of the “Ringstraßen Period” designed this lantern for a mansion he built around 1875.

The lantern is made with utmost care and precision not relying on simplifying techniques. So for example the decoration on the decorative beading is not made from pressed sheet metal but with additional brass rods screwed on the material.

The floral designs on the bottom and on top are elaborately cast and refined on our workshop.

Design: Theophil Hansen, circa 1875; Historism

Material: Brass; Finish: Gold

Special requests: Other metal finishes

Dia.: 37 cm, H.: 70 cm; Weight: 18 kg

Lights: 3 candles; Max. Wattage: 180 W
