Wall Sconce 42304-W-1 "Jeddah"

The Arabic Family

For a private residential project in Jeddah we manufactured this elegant wall lantern. The simplicity of the shape responds to the elaborate copper finish. The light source is hidden behind a frosted glass shade so any type of light bulb can be used. This makes it perfect for outside purposes such as doorways or walkways along walls.

The inspiration for this design stems from traditional lighting fixtures burning coal or oil.

Design: Lobmeyr, 2001; Arabian
