Drinking set no.267 „Alpha“ - nesting bowls

design: Hans Harald Rath 1952

Hans Harald Rath, designed the „Alpha“ set in 1952. The even shape full of tension makes the glasses lie smoothly in the hands. The idea came from a medieval copper tumbler, itself influenced by Islamic shapes.

Following the trend of the fifties the glasses can be stapled – bearing the spirit the Frankfurter Küche (“for the young household”). Thinnest Musselglas, mouth blown into wooden forms, gives them elegance.

Cocktail tumbler, water tumbler, flower bowl and salad bowl III. size are produced in six subtle colours (rosalin, light blue, light green, amethyst, citrin and grey) today. Together they make up a very usefull and nice set of bowls.
