

CONTAINERS AND BOWLS – WIPPSCHALE

White, glazed

size 9 cm · diameter 16 cm · product no. 12.065

Long before loft style and industrial chic found their way into the world of design, the first laboratory porcelain came into being in the Nymphenburg manufactory – handmade, of course, like every piece from the master workshops. A wealth of paraphernalia, including the round bottom bowl series, transformed these elegant research accessories into a sought-after best seller. This can be attributed not least to the wide range of uses to which the bowls, between 13 and 22 cm in size, can be put in everyday life.
