

CONTAINERS AND BOWLS – DISH

Lotos, Sirius Mulberry Fond

Design: Wolfgang von Wersin, 1942

diameter 18 cm · product no. 12.198

When it comes to the manufacture of a Sirius plate, artistic finesse and technical skill determine each and every step. Handmade with flawless precision, the painter positions the star in the middle of this 18 centimetre wide dish. When fired, the 24-carat pure gold melts into the body, a process that makes it safe for the dishwasher. The brilliance of the star and the gold border only comes to the fore at the end, when they are polished with an agate burnisher or burnishing stone.
