

SPOONS – SPOON

Gerippt, white glazed

length 12 cm · product no. 05.757

Some things are so good that they only have to be supplemented, and not completely reinvented. Wenzel Hasler also discovered this when he created numerous accessories for the “Gerippt” model from September 1894 onwards. They include this 12-centimetre-long spoon, which is shaped like a miniature ladle. It bears the classic wave pattern on the upper part of its handle. Incidentally, the service itself has long been a design classic, for it became part of the Neue Sammlung Munich’s collection in 1971.
