In line with its tradition and its valuable legacy, Manufaktur Nymphenburg still works based on the values of top-notch artistic quality. Which is why it is constantly inviting contemporary artists to produce new forms and designs. Viennese graphic and product designer Sebastian Menschhorn is one of them. His single-colour floral patterns have thus far featured on the hare, the pug and the elephant from the workshop's historic repertoire of figures. As of 2011, the stylised flowers of life now adorn the whole range of Werner von Wersin's Lotus range.
